VNeST Protocols: Cases, Assessment, and Outcome Measures

Lisa A. Edmonds, PhD, CCC-SLP

Course Objectives:

- Describe the aims of VNeST within the context of specific clinical problems.
- Review the VNeST protocol, including the each step in the protocol and the rationales for those steps
- Describe a selection of assessment of assessment and outcomes measures that facilitate implementation of the protocol

Chapter 1: Aims of VNeST

The first chapter of this course describes the clinical aims of VNeST via a clinical case example.

Chapter 2: Review of the Protocol

The second chapter of this course provides a review of the protocol including examples and rationales for each step.

Chapter 3: Assessment and Outcome Measures

This chapter provides suggestions for clinical assessment and evaluation of potential post-treatment improvements, and introduces key outcomes/generalization measures used in VNeST studies in order to contextualize results.
