

Learning Objectives

MedBridge
A Physiologic Approach to Voice Therapy
Joseph C. Stemple, PhD, CCC-SLP, ASHAF

Course Objectives:

Upon completion of this course, learners will be able to:

1. Understand the necessary artistic and scientific ingredients of voice therapy.
2. Describe and choose the various orientations of voice therapy to meet their patients' needs.
3. Apply the concepts of the voice therapy orientations to a variety of voice disorders.
4. Understand that SLPs do not treat the pathology, but rather the underlying physiology that results from the pathology.
