Course Objectives

MedBridge
Childhood Assessment of Normal and Dysfunctional Feeding & Swallowing
Maureen A. Lefton-Greif, PhD.,CCC-SLP, BCS-S + Joan C. Arvedson, PhD., CCC-SLP, BCS-S

Course One Description:
This session will focus on defining feeding/swallowing disorders (FSDs) in infants and children, the prevalence/incidence and characteristics of FSDs, identifying underlying etiologies, and the impact of these problems on the development system.

Course objectives: Participants will be able to
• Define feeding/swallowing disorders (FSDs) in children
• Identify factors that may interrupt feeding/swallowing development
• Describe the prevalence of FSDs in children
• Identify challenges in understanding and managing FSDs in children
