Learning Objectives

MedBridge
An Introduction to Osteoarthritis
Christopher G. Bise PT, MS, DPT, OCS

Course Objectives:
Upon completion of this course, learners will be able to:

• Identify the growing burden of Osteoarthritis and its effects on the public health system at large.
• Explain the current theories behind the development and progression of OA, identifying the modifiable risk factors for patients
• Identify and communicate the clinical criteria used to diagnosis OA
• Using current evidence, identify and implement appropriate conservative interventions for those patients with OA.
