Laryngeal Videostroboscopy: Part Two

Edie R. Hapner, PhD CCC-SLP, Michael M. Johns, III MD

Course Objectives

- Increase their confidence in reviewing laryngeal videostroboscopy examinations provided as part of the patient's medical records.
- Utilize the findings from laryngeal imaging examinations to guide the development of prognosis for voice therapy.
- Understand the ASHA scope of practice, CMS current view on scope, the AAOHNS Guidelines for the Treatment of Dysphonia and the stance on the use of laryngeal imaging by the speech language pathologist, and state mandates
