Rehabilitation Nursing for Patients with Cardiac Diseases
Cheryl Lehman, PhD, RN, CNS-BC, CRRN

Course Objectives:

- Identify the benefits of cardiac rehabilitation.
- Analyze specific rehabilitation activities and interventions found in a cardiac rehabilitation program.
- Differentiate between the diseases recommended for cardiac rehabilitation.
- Review indications for cardiac rehabilitation for specific cardiac conditions.
- Review the role of the rehabilitation nurse in the cardiac rehabilitation team.
- Outline specific nursing interventions to support and improve the patient’s anticipated rehabilitation outcomes.
