Overview of Pediatric Rehabilitation Nursing

Cyndi Cortes, DrPH, MSN, MRE, CPNP-PC, CRRN, COI

Course Objectives:

- Identify children's developmental stages: psychoanalytically, cognitively, morally, and socially.
- Recognize typical and delayed growth and development in children.
- Compare developmentally appropriate care for a school age child and a high school adolescent.
- Analyze rehabilitation issues seen in individuals with the congenital conditions discussed.
- Contrast the management of acquired and congenital conditions.
- Recognize appropriate referrals for services provided by the school system and other community agencies.
