The Athlete’s Hip: Evaluation of Groin Pain
John Snyder, PT, DPT, OCS, CSCS

Course Objectives:
Upon completion of this course, learners will be able to:

- Describe common traits of individuals with groin pain and those at increased risk of developing groin pain
- Identify appropriate special testing and patient characteristics indicative of femoroacetabular impingement syndrome (FAIS)
- Identify the presence of concomitant intra-articular pathology in those presenting with FAIS
- Selectively identify the underlying pathology or structure involved in the athlete presenting with athletic pubalgia
- Identify and differentiate anterior nerve entrapment from osseous and musculotendinous hip pathology
