Medical and Ethical Dilemmas: Nutrition For Adults With Dysphagia

Michael Groher, PhD, F-ASHA, Honors ASHA

Course Objectives:

- Apply principles of medical ethics to patients in need of tube feeding
- Identify and distinguish between types of feeding tubes
- Utilize a risk/benefit strategy for selecting patients for oral or tube feeding
- Implement a strategy to reinstitute oral feeding in tube-fed patients
- Develop a method to improve one's decision-making when ethical dilemmas arise pertinent to tube or oral feeding
