Review of Systems: Gastrointestinal, Hepatic/Biliary, Urogenital
Michael L. Fink, PT, DSc, SCS, OCS

Chapter 1: Gastrointestinal
• Identify common non-musculoskeletal pathology in the Gastrointestinal system
• Highlight select risk factors, interview questions, and physical exam findings to aid in differentially diagnosing Gastrointestinal disorders from musculoskeletal pathology.
• Master common signs & symptoms of select pathologies within the Gastrointestinal system
• Identify situations that require a urgent medical referral

Chapter 2: Hepatic & Biliary
• Identify common non-musculoskeletal pathology in the Hepatic and Biliary systems
• Highlight select risk factors, interview questions, and physical exam findings to aid in differentially diagnosing Hepatic and Biliary disorders from musculoskeletal pathology.
• Master common signs & symptoms of select pathologies within each system
• Identify situations that require a urgent medical referral

Chapter 3: Urogenital
• Identify common non-musculoskeletal pathology in the Urogenital system
• Highlight select risk factors, interview questions, and physical exam findings to aid in differentially diagnosing Urogenital disorders from musculoskeletal pathology.
• Master common signs & symptoms of select pathologies within the Urogenital system
• Identify situations that require a urgent medical referral
