Measuring the Entire Stuttering Disorder

Scott Yaruss, PhD, CCC-SLP, BRS-FD

Chapter 1: Real-Time Analysis

- Differentiate between stuttered types of disfluencies and non-stuttered types of disfluencies

Chapter 2: Real-Time Analysis of Speech Disfluencies

- Demonstrate the ability to count disfluencies in a speech sample

Chapter 3: Real-Time Analysis of Spontaneous Speech

- Explain the value of making real-time measures of speech disfluencies

Chapter 4: Reliability

- Conduct specific analyses of your own measurement reliability to ensure that you are collecting good data
- Know which differences are due to the client's progress and which are simply due to measurement error
